Carbon Literacy Community Pot

Carbon Literacy® training is a proven and reliable tool for **delivering action** to cut carbon emissions and improve the **health and prosperity** of our communities in the process.

Carbon Literacy is **for everyone**, but access to training varies globally due to relative spending power.

Our **Community Pot** aims to **improve access** to Carbon Literacy training for those who might otherwise **struggle to afford** the costs associated with initiating training.

With thanks to the funders

Green Match Fund
BigGive

The Community Pot has been created with **contributions from organisations** that have paid **enhanced rates** for Carbon Literacy Certificate Applications.

For the Global South round, we received additional match funding from the Big Give's Green Match Fund as part of our **Empower Global Communities** campaign.

This round provided the equivalent of **£25,000** in funded services to **13** low-income and underrepresented groups in countries in the **Global South.**

Meet the recipients ⟶

YES Global Initiative

"When we discovered our calling to push for a green curriculum in schools, we embarked on a journey to take climate and environmental literacy to the classroom level. With this funding, we plan to develop a course and train and certify 100 secondary school students making up two Green Champions Clubs in Kampala City and this will serve as a pilot that can be replicated to other schools."

Uganda

Peru

Fablab Peru

“Carbon Literacy for ancestral communities is a course that seeks to empower its members to be leaders in their communities, fighting for their rights and continuing with the arduous work of taking care of their home. Thanks to the Community Pot we will be able to certify members of our team and also the first groups of participants.”

Green Waka

“Our goal is to use this climate action-driven and life-changing program, which has the encouraging support of the Community Pot, to train journalists, young people, labour unions, and faith-based leaders to help Nigeria and other regions achieve their environmental sustainability goals by ensuring that Carbon Literacy is widely accepted and integrated into all aspects of national life.”

Nigeria

Alterna Impact

“Our community group, rural and indigenous entrepreneurs in Guatemala, is eager to embark on this initiative to deepen their understanding of climate action. They look forward to learning how to effectively integrate sustainable practices within our unique contexts, empowering them to make a meaningful impact in their local environments.”

Guatemala

Supported by
Hablemos de Futuros

NGYouthSDGs

“We're excited to offer Carbon Literacy training to 50 young Nigerian researchers and educators, supported by The Carbon Literacy Project, NGYouthSDGs, and Zeroverse. This initiative will empower youth to tackle climate change and drive systemic change. We look forward to the sustainable solutions participants will develop through their action plans.”

Nigeria

Supported by **Zeroverse**

Climate Hub International

“Climate Hub International is dedicated to empowering communities through Carbon Literacy and sustainability education. We are most excited about the impact this funding will have on increasing Carbon Literacy among our community members, enabling them to make informed decisions towards a sustainable future.”

Uganda

Workskills Community Initiative

“With the Community Pot and funded services grant from CLP, [Workskills Community Initiative] will be able to deliver Carbon Literacy training to 100 youth and women as a way of creating awareness and bringing information closer to local communities on how they can contribute positively in the global discourse of global warming and de-carbonisation of the natural environment for a sustainable future.”

Uganda

Tanzania

The Tumaini Trust

“The Tumaini Trust is delighted to have been awarded a grant to fund Carbon Literacy training in Tanzania...We are looking forward to raising awareness of the causes of climate change and its effects, especially highlighting the benefits of community action and tree planting which will outline the fundamental role the Group is already playing.”

Supported by **The Kathryn Jenkins Consultancy**

Progressive Students Network

“Progressive Students Network was established to motivate students to maximise their potential. We organise Youth Leadership seminars and training programs across Ghana especially in rural areas to help students identify, develop and deploy their leadership traits to serve their communities. The Community Pot will support our Carbon Literacy initiative outreach to student teachers in Oti Region of Ghana.”

Ghana

ZuriPlanet Africa

“This funding will enable ZuriPlanet Africa to offer no-cost Carbon Literacy training to 190 individuals from economically underserved communities in Kenya. This initiative will help these communities better understand climate challenges, reduce their carbon footprints, and adapt to climate change in one of the world's most vulnerable regions.”

Kenya

Presente Futuro

“Presente Futuro aims to empower Argentina’s cultural and creative industries to address the climate emergency through a holistic approach...Carbon Literacy will be a key focus in the initial phase, aligning shared ambitions for the sector and encouraging climate action across diverse contexts.”

Argentina

Supported by
Nicolás Conde

Sankandi Youth Development Association

“The Sankandi Youth Development Association (SYDA) is a grassroots project based in the Kiang West of The Gambia, in West Africa, focused on restoring the native mangrove forests and empowering the local rural communities. Through Carbon Literacy, it aims to equip the community with knowledge to make informed decisions and take proactive steps towards environmental sustainability.”

The Gambia

Sustainable Food Foundation

“We are excited to extend our Carbon Literacy initiative to 100 refugees in Hong Kong. This exciting programme will offer participants valuable insights into the intersections of food systems and climate change, preparing them with critical skills for careers in the food service industry. By empowering these individuals, we aim not only to foster resilience and awareness within underserved communities but also to contribute to a broader, sustainable transformation within Hong Kong’s food sector.”
