Help keep Carbon Literacy free for schools!

Schools play a vital role in helping young people understand climate change and feel capable and confident to act. Through **Carbon Literacy® training**, teachers, staff, and school leaders gain the confidence to embed climate action across school life.

How it works?

A Ready-to-use Training Toolkit

The Carbon Literacy Schools Toolkit gives educators a clear, practical route to bring climate learning into everyday teaching.

★ **building resilience** ★ **confidence** ★ **student leadership**

Independent Certification

After completing a day's worth of training, teachers and staff are certified *Carbon Literate* – recognised for being equipped and committed to embedding climate action into their personal and professional lives.

→ **inspiring change** → **cultivating hope** → **building agency**

Impact so far...

Carbon Literacy is helping schools build communities of practice, empower students, and *drive low-carbon thinking.*

Since launching this Summer:

60	Schools accessed the Toolkit
80	Staff trained
288	tonnes CO_2e saved

How you can help

The Toolkit is free for schools to access, but maintaining and expanding it comes at a cost. Your donation helps keep this vital **resource free** – ensuring every school can deliver climate education.

Double your donation!

For one week only, every donation will be matched and doubled – helping more schools prepare the climate leaders of tomorrow.

- Supporting **400 more** teachers and staff to become *Carbon Literate*
- Enabling **13** schools to act on climate without financial barriers
- Building a Carbon Literate **next generation**

Big Give Christmas Challenge

Christmas Challenge BigGive

When: 12pm Tuesday **2nd Dec** to 12pm Tuesday **9th Dec**

Goal: £10,000

Match Funders: Westford Mill & PlanAid
